| 2026 | 6     | SRM UNIVERSITY AP, India Bachelors in Technology with Major in Computer Science.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 2022 | 7     | MUNCIPAL JUNIOR COLLEGE (Specialized in Mathematics, Physics, Chemistry)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|      |       | Work Experience (Apprenticeship/Internship)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 2025 | 1-5   | Research Intern at SRM University AP Engineered an automated skin disease prediction system using Deep Learning and Image Processing to analyze dermatological data. Developed a comprehensive pipeline for image preprocessing and feature extraction, implementing Convolutional Neural Networks (CNNs) to achieve high-accuracy diagnostic classification. Conducted comparative model evaluations to optimize performance, demonstrating the potential of computer vision in providing scalable, non-invasive medical diagnostic solutions                                                                                                           |
| 2024 | 5-8   | Completed an intensive two-month Japanese language immersion program, focusing on the acquisition of professional linguistic skills and business etiquette. Developed proficiency in JLPT-aligned communication by engaging in daily simulations of Japanese corporate environments and collaborative group projects. Conducted a comparative study of Japanese business culture versus global standards, culminating in a final presentation delivered in Japanese. This experience facilitated the bridge between technical CSE expertise and bilingual communication, specifically tailored for integration into Japanese multinational corporations. |

| 2025      | 2–5   | CollabLearn – Online Collaborative Learning Platform<br>Tech Stack: React.js, Tailwind CSS, Firebase, JavaScript<br>Built a real-time learning portal with Firebase authentication and database. .<br>Key Contributions:<br>* Designed real-time chat and session features with Firebase.<br>* Used React hooks and context API for state management.<br>* Built mobile-friendly UI using Tailwind CSS.                                                                                                                                                                                                                                     |
| 2026      | 1–5   | <b>Capstone Project   Lung and Colon Cancer Detection using Deep Learning</b><br>Developing a dual-purpose diagnostic system utilizing Deep Learning to automate the detection of lung and colon cancer from histopathological imagery. Implemented state-of-the-art Convolutional Neural Network (CNN) architectures to perform multi-class classification and feature extraction with high precision. Optimized model performance through data augmentation and transfer learning techniques, focusing on improving early-stage diagnostic accuracy to support clinical decision-making in oncology.                                      |
| 2025      | 6–9   | <b>AI-Driven Cross-Language Learning Platform</b><br>Developed a multi-language learning platform leveraging <b>Natural Language Processing (NLP)</b> and <b>Speech Recognition</b> to provide real-time grammar and pronunciation analysis. Engineered personalized learning pathways and interactive AI chatbots using <b>Python</b> and <b>TensorFlow</b> to facilitate immersive language acquisition. Built the responsive frontend with <b>React.js</b> and <b>Tailwind CSS</b> , while managing user authentication and real-time data synchronization via <b>Firebase</b> to ensure a seamless, data-driven educational experience. |
| 2024–2026 | 6–6   | Convener of the <b>Gym Club</b> at <b>SRM University AP</b> . I played a key role in organizing fitness events, managing club activities, and promoting health and wellness among students.                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
